DETAILED ACTION

Reason for Allowance

1. The following is an examiner's statement of reasons for allowance: Claim 1 and its dependent claims are allowable because the recitation of a clothing patch attached to the exterior of an article of clothing having a parabolic shaped open cell polymer cushion. Clothing patches are well known in the apparel arts to cover the exterior of an article over a hole in the article or for decoration purposes only. These well known clothing patches are not made out of open cell polymer cushion. Other well known articles are body protective padding which can be made out of both open and closed padding material. However, the body protective padding would need to be attached to the exterior of the clothing article and in a parabolic shape.

The references of Aldrich and Crampton show a knee patch attached to an article of clothing. However, Aldrich fails to teach the pad being parabolic shaped and attached to the exterior of the garment article. Crampton fails to teach the pad being an open cell polymer cushion, parabolic shaped and being attached to the exterior of the garment article.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
